Gov't hiding spacemen's bodies, claims expert

ALIEN... as described by witnesses.

THE U.S. government is hiding the bodies of 30 aliens killed in UFO crashes, claims a top UFO expert.

"The government has in its possession 30 dead alien crew men gathered from sites of various crashes over the past 15 years," Walter H. Andrus Jr., director of the world-wide Mutual UFO Network, told GLOBE.

"It has taken us a long time to confirm it, but we have seven

authentic witnesses who have actually seen the bodies.

"These bodies have been preserved and are being studied by our top medical scientists for some clue as to how these alien beings function.

Small

"This is the most exciting news in the history of UFOs. There is no way now the U.S. military can continue to deny the existence of UFOs."

Andrus gave the following descrip-

tion of the creatures:

"They are very small — about four and a half feet tall — and slender. They have grayish, palled skin covering a frame that has no blood. They have four fingers and a very short thumb — but no nails.

"The head is quite large, narrowing at the chin and they have no nose — just two nostrils. The mouth is merely a slit and the eyes are quite large and bulging."

R.P. Nat'l Police Probe UFO Report

MANILA (UPI) — Military authorities investigated Monday a report by an American conservationist that a flashing, "balloon-like unidentified flying object landed in a remote southern Philippine village.

Maj. Odelon Asis, acting provincial commander of Davao Del Sur Province, told United Press International he was sending a national police patrol to the reported landing site at the foot of Mt. Apo outside Davao City 600 miles (960km) south of Manila.

"Residents in the area have reported seeing rocket-like objects and I'm looking into this," Asis said in a long distance telephone interview.

Asis said he had not directly heard from Ron Kruppa, 36, of the American-based Film and Research for the Endangered Environment (FREE) who reported the UFO sighting to Davao officials.

Kruppa has been studying for the past two years the near-extinct monkey-eating eagle homing in the jungled 10,311-foot (3,125m) Mt. Apo.

He had set up camp at Upper Baracatan village where he, two Filipino helpers and 600 villagers claimed they saw the object at about 8 a.m. Sunday.

Filipinos Report A Colorful UFO

MANILA, Philippines — Another UFO has been reported sighted over the Philippines.

An Unidentified Flying Object, flashing a rainbow of colors, was seen over a southeastern city on the main Philippine island of Luzon last week, according to published reports.

The newspaper Daily Bulletin said residents of Legazpi, 220 miles southeast of Manila, rushed out of their homes to view the object and were "enthralled" at the colors it flashed before it headed east.

Nine days ago, an American scientist claimed he and hundreds of villagers saw a UFO land in the southern Philippines at the country's highest mountain peak.

There were other reports of similar sightings in the Philippines in recent weeks. Authorities have ordered an investigation but so far have not announced any findings.

THE MIAMI HERALD Tuesday, May 29, 1979

THE QUINCY HERALD-WHIG, Tuesday, June 26, 1979

CHICAGO — Witnesses reported seeing as many as 20 brightly lighted, unidentified objects Monday in southwestern Michigan and northern Indiana, the Chicago Tribune reported Tuesday. The Tribune said the lighted objects, described by one witness as "like putting diamonds and rubies up to a very bright light," were observed near Lake Michigan. J. Allen Hynek, director of the Center for UFO Studies, is investigating the sightings.

Scientists urging more U.S. research on particle beam 'death ray'

WASHINGTON (UPI) — Scientists are recommending that the Pentagon step up research on particle beams — streams of energy likened to lightning bolts or a Buck Rogers death ray — in a program that could cost \$1 billion over 10 years. Dr. Ruth Davis, the Pentagon official in charge of research and advanced technology, said in an interview a panel of 53 scientists studying the matter soon will send its final report to Defense Secretary Harold Brown. Particle beams fired from the ground or space at close to the speed of light — 186,282 miles a second — have been suggested as a means of stopping enemy nuclear missiles before they reach the United States.

HOUSTON POST 1/22/79 R9A

PRINCETON, N.J.
FRANKLIN NEWS-RECORD
JUN 28 1979

An unidentified flying object, or UFO, apparently swooped low over Franklin Township on June 21, according to this week's police report.

Two township patrolmen, Steve Perrine and Martin Hoyvik, observed three lights revolving in a circle in the night sky. The UFO was seen while driving on East Avenue Shopping Center where Krauszer's clerk Heidi Hanson also described her sighting of the object.

About an hour later, a Newark Airport flight controller apparently observed the same object, police said.
